To the Council of the ERA-EDTA

Wuerzburg, 29.01.2020

Dear all,

I am writing in support of Professor Marcin Adamczak, MD, Department of Nephrology, Transplantation and Internal Medicine, Medical University of Silesia, Katowice, Poland and current member of the Council of the Polish Society of Nephrology.

Professor Adamczak is in the process of bringing forward his application to become a Council Member of the ERA-EDTA with the support and nomination of the Polish Society of Nephrology. Prof. Adamczak is a highly respected researcher and nephrologist in Poland and has a research history in Germany and visibility in countries across Europe. With his academic experience he would be an excellent member for the Council and a representant of Central and Eastern european countries. He finds my unrestriced support for his candidature.

Best regards
